

Abstract

Title: Influence of completion the introductory course in the study of Faculty of physical education and sport students

Objectives: Evaluation of potencial connection between completing voluntary introductory course at Máchovo jezero and study succes of Faculty of physical education and sport of Charles University in Prague students. Description of mentioned event and selection of respondents. Definiton of connection words succes and studying, and provision of recommendation for board of faculty based on gained informations, if there is connection between course between course and studying and how to edit course to be more effective.

Methods: Main research methods in this thesis are used kvantify questionnaire and in-depth interview with main organizer of event. Research file is made by students, who were hired for studying at faculty in years 2014-2018, beacuse examined course took same place and activites during these years. Gained informations were examined by descriptive, factor and correlation analysis.

Results: Based on description of event were determined goals of course., which were based on descriptive analysis achieved. All these goals had influence on research file and theirs advance to second year of studying, so course structure even after verification by factor analysis was made correctly. Results of correlaction analysis showed that examined event had no significant effect on research file for advancinf to second year of studying. Based on other gained information was made proposal, on which goals shall current course focus in order to get effective influence.

Keywords: Event, course, factors, sport, project, teambuilding
